

ABDUL RAHEEM ALI KHAN

Aspiring Software Engineer

Bengaluru, Karnataka | +91 8317370307 | abdulraheem2386@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Aspiring Software Engineer with hands-on internship experience across embedded robotics, data encryption, and DevOps/cloud automation. Skilled in Python, Java, Linux, and Docker, with a track record of building working hardware-software systems and a strong interest in software engineering and cloud-native development.

TECHNICAL SKILLS

Languages: [Java](#) [Python](#) [Embedded C](#)

Platforms & Tools: [Linux](#) [AWS Cloud](#) [Docker](#) [Git/GitHub](#) [MySQL](#)

Networking & Security: [Network Security](#) [Information Security](#) [Data Encryption](#) [Cisco Packet Tracer](#)

Other: [Problem Solving](#) [IoT Concepts](#)

EXPERIENCE

Intern – STEM Trainee (Robotics & AI) — Tescom Technologies Pvt. Ltd.

Dec 2025 – Apr 2026 | Bengaluru, Karnataka

- Designed and built a robotic arm using an ESP32 microcontroller, programming servo motor movements in Embedded C via Arduino IDE.
- Integrated servo motors and embedded controllers with a 3D-printed arm and metallic base for precise angular movement and object handling.
- Tested multi-servo synchronization and movement accuracy, achieving controlled object handling with scope for future pick-and-place automation.

Intern – Project Trainee (Cybersecurity / Data Encryption) — Rooman Technologies Pvt. Ltd.

Apr 2023 – Jun 2023 | Bengaluru, Karnataka

- Built a secure data transmission system applying data encryption concepts to protect communication confidentiality and integrity.
- Studied cybersecurity fundamentals and secure communication principles, collaborating with a project team on implementation.

Trainee – DevOps / Cloud & Automation (ARTH 3.0) — LinuxWorld Informatics Pvt. Ltd.

Sep 2022 – May 2023 | Bengaluru, Karnataka

- Practiced Linux administration and Docker containerization, and gained hands-on exposure to AWS cloud services.
- Learned DevOps concepts and automation workflows, including Ansible-based automation through dedicated training sessions.

PROJECTS

Secure Data Transmission System (Data Encryption, Networking, Cybersecurity Concepts)

- Designed a secure communication system using encryption frameworks to protect data confidentiality and integrity across multiple campus systems.

Robotic Arm Automation (ESP32, Arduino IDE, Embedded C, Servo Motors)

- Developed a robotic arm integrating embedded controllers and servo motors for precise, synchronized movement and object handling.

GitHub: github.com/abdul-86

Full-Stack Consultancy Platform (Responsive UI, Backend Integration)

- Built a consultancy platform with a responsive interface and backend integration for client communication and service management.

Alumni Platform for University (Capstone Project) (PHP, Laravel, MySQL, Flutter)

- Built a full-stack alumni engagement platform with a web portal and companion mobile app, enabling alumni-student networking, event updates, and communication, as part of a final-year team capstone project.
- Developed the web portal using PHP and Laravel with MySQL (managed via phpMyAdmin); built the cross-platform mobile app using Flutter.

EDUCATION

Presidency University — B.Tech in Computer Science and Engineering, CGPA: 7.15 | Bengaluru, Karnataka

M.N Technical Institute — Diploma in Computer Science and Engineering, CGPA: 8.15 | Bengaluru, Karnataka

Five 'H' English School — SSLC, 70.71% | Bengaluru, Karnataka

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy
- STEM Training in Robotics & Artificial Intelligence | Project Training in Data Encryption & Cybersecurity | Webinar on Ansible Automation
